

# Youth Justice Alliance

**About:** Youth Justice Alliance supports first-generation and underrepresented students pursuing careers in law. Through long-term mentorship, paid opportunities, and guided academic support, they help students overcome barriers and build a path to law school.

**Mission:** Their mission is to remove the barriers that keep first-generation and underrepresented students from entering the legal field, providing the mentorship, resources, and opportunities needed to create a more just and inclusive future in law.

**Vision:** To build a future where every aspiring lawyer has equal access to opportunity and support.

## Project:

We helped YJA analyze potential investment strategies and choose the strongest one, and we identified an AI automation platform that can automate and strengthen their student-support process.

## What We Learned:

- How organizational values, risk tolerance, and long-term goals shape nonprofit investment strategies
- How nonprofits balance mission-driven activities with financial constraints to ensure sustainable impact
